Acid phosphatases secreted by *Hebeloma cylindrosporum*, 511
Acid soils
  caesium sorption and fixation in, 97
  forest
    aluminium extracted from, 89
    distribution of cation exchange capacity between organic matter and mineral fractions in, 545
  sandy
    aluminium extracted from, 81
    copper in, 523
  *see also* pH
Adsorption of isoproturon on soil and pure clays, 265
AFM *see* atomic force microscopy
Aggregation/aggregates
  denitrification linked to nitrate leaching, 305
  kaolin and quartz and associations between humic acids and iron or aluminium, 335
  particulate organic matter in during cultivation, 495
  stability
    crustability and erodibility, 425
    and strong hydroxide solutions, 43
Agriculture *see* cultivated soils
Alumina-sorbed phosphate mobilized by roots of ryegrass and clover as related to rhizosphere pH, 533
Aluminium
  $^{27}$Al MAS NMR spectroscopy study of excessively fertilized soil, 125
  in associations in water extracts from Andisols and Andic soils, 385
  biological availability and silicic acid, 137, 139
  extracted from acid forest soil, chemical significance of, 89
  and humic acids, effects on flocculation and aggregation of kaolin and quartz, 335
  hydroxysulphate complex, sorption of phosphate and oxalate by, 241
  organic matter complexation to predict solubility in acid forest soils, 373
  in strongly acidified sandy soil in Poland, 81
Analytical pyrolysis and land use effects on composition of organic matter, 61
Analytical transfer function approach to modelling leaching of reactive solutes through field soil, 33
Andepts, zinc sorption-desorption by, 257
Andisols and Andic soils, effect of water : soil ratio on phosphate release in, 385
Anions and solubility of soil phosphate, 231
Associations
  humic acids and iron or aluminium effects on flocculation and aggregation of kaolin and quartz, 335
  phosphorus, aluminium and fulvic acid in Andisols and Andic soils, 385
Atomic force microscopy (AFM) investigations of surface topography of multidomain porous goethite, 329
Bioavailability
  of aluminium, silicic acid and, 137, 139
  of phosphorus and solubility of soil phosphate, 231
*Bradyrhizobium japonicum* and soya bean cropping history, 505
Bulk density and dielectric properties of soil, 367

Caesium
  $^{137}$Cs release in peat soils, formis and, 105
  sorption and fixation in acid organic soil, 97
Calibration of dielectric TDR soil moisture determination, 357
Carbon
  $^{13}$C-NMR and pyrolysis-field ionization mass spectrometry of sewage farm soils, 71
  $^{14}$C age and residence time of organic matter and its lipid constituents in stagnohumic gley soil, 215
  dynamics and modelling in cultivated soils, 485
  total in world soils, 151
Castletownbere, Ireland: man-made iron pan podzol near, 279
Cation exchange
  capacity between organic matter and mineral fractions in acid forest soils, 545
  hysteresis scanning curves, 345
Centrifugation, soil solution chemistry assessment using, 395
Ceramic-cup and zero-tension plate lysimeters compared, 407
Changes in chemical properties of organic matter with intensified rice cropping, 293
Charge and pH of soil, effect of time of incubation on relation between, 131
Chemistry/chemical
  aluminium
    extracted from acid forest soil, 89
    in strongly acidified sandy soil, 81
  composition of soil solutions collected lysimeters in forest soil, 407
  properties changes of organic matter with intensified rice cropping, 293
Chloride salt solutions used to extract aluminium, 89
4-chlorophenol sorption-desorption and organic matter, 567
Clay
  -associated organic nitrogen turnover in silty loam, 285
  pure, isoproturon adsorption on, 265
Clover roots and mobilization of phosphate as related to rhizosphere pH, 533
Comparison
  of chemical assessment using lysimeters or centrifugation, 395
  of chemical composition of soil solutions collected by lysimeters in forest soil, 407
Congo: monosaccharides of savana soils after plantation of *Pinus* and *Eucalyptus*, 215
